WELDER

PROFILE: Highly innovative, creative and self-motivated individual with a learned background in performing fabrication work. Deep knowledge of construction and production sites, along with great interest in metallurgy. Well-versed in using a variety of manual and semi-automatic welding tools. Familiar with flame-cutting equipment and metal shaping machines.

SPECIAL TALENTS

- Able to read and interpret diagrams and sketches to determine required materials and operations for specific welding projects
- Special talent for setting up and maintaining welding equipment, with special focus on implementing personal and company safety measures

CORE COMPETENCIES

- | | | |
|-----------------------------|-----------------------|--------------------------|
| – Safety protocols | – Brazing & Soldering | – Structured fabrication |
| – Blueprints interpretation | – NCRs | – Inventory Control |
| – Arm-hand steadiness | – Shop mathematics | – Pipeline Construction |

EDUCATION & CERTIFICATION

Diploma: St. James High School, 2014

Red Seal – Laborers' Certification School

WELDING EXPERIENCE

Ring Power Corporation, Dardanelle, AK | 6/2013 to 9/2013

Welder Apprentice

- Assisted in laying out, positioning and fitting various parts for welding
- Adjusted valves, gauges and flames on equipment and handled compressed gas and oxygen cylinders to be used during welding procedures
- Operated air arc gougers and grinders and set up hand and power tools to be used during the welding process
- Examined completed pieces for conformity and quality
- Cleaned and maintained work areas to ensure proper functioning and safe working conditions
