

Average Age

INSTITUTIONAL RESEARCHERS:
Bridging the Gap Between Data and Decisions

For fall 2016 (data not final), the average age is 24.7 with an enrollment of 1,641. In comparison, the average age and enrollment in fall 2012 was 28.3 and 1,446 respectively. Over the past few years, Trenholm State Community College has embarked upon an aggressive campaign to enroll more traditional age students. This has been done by mainly recruiting dual enrolled students. Dual enrolled students are high school students who are taking college level classes while still in high school. As we continue to recruit more traditional students, we can expect for our average age to continue to decline.
