

## MISSION STATEMENT

The Medical Radiologic Technology program mission is to prepare individuals as entry-level radiographers who are able to fulfill the needs of the medical community in the service area by competently and safely performing diagnostic radiographic procedures on adults and children.

## PURPOSE AND GOALS

The purpose of the program is to provide educational opportunities in the radiologic sciences to members of the communities supported by the sponsor. To that end, the goals of the program and its curriculum are designed to: provide educational opportunities in the radiologic sciences to members of the communities supported by the sponsor. The goals of the program and its curriculum are:

### Goal #1

Students will demonstrate clinical competence while safely performing diagnostic radiographic procedures.

#### Outcomes:

- 1.1 Students will demonstrate knowledge of radiation safety practices.
- 1.2 Students will accurately position patients for diagnostic radiographic procedures.

### Goal #2

Students will demonstrate the necessary communication skills to function effectively in the medical community.

#### Outcomes:

- 2.1 Students will demonstrate the ability to effectively communicate verbally in a healthcare setting
- 2.2 Students will demonstrate the ability to communicate in written form relating to healthcare.

### Goal #3

Students will demonstrate critical thinking skills.

#### Outcomes:

- 3.1 Students will demonstrate the ability to adapt to radiographic procedures on non-routine situations.
- 3.2 Students will demonstrate the ability to assess images for acceptable diagnostic quality.
