

2027 Biomedical Engineering and Informatics Paid Internship Program

**Application
Deadline**
January 29,
2027

Wake Forest School of Medicine Biomedical Engineering Department and Center for Artificial Intelligence Research, this summer program offers hands-on research and mentorship in biomedical engineering and informatics.

Students from institutions with limited STEM research opportunities, community college, and North Carolina students, are especially encouraged to apply. Open to undergraduates and Master level graduate students for 10-weeks of research experience, mentoring, exclusive workshops, bootcamps and seminars.

General Qualification:

- Minimum age: 18 years old (by May 25, 2027)
- Completed at least 2 semesters of undergraduate or graduate education (by May 25, 2027)
- Cumulative GPA of 3.0 or higher

Project Topics:

- Machine Learning and AI Applications
- Data Science, Biomedical Informatics, and Analytics
- Diagnostics and Therapies for Cancer Patients
- Medical Device Testing and Prototyping
- Biomedical Injury Mechanics Military, Sports, and Spaceflight Safety
- Injury Prediction Model
